The BARNWELL SITE receives waste directly from waste generators, and also receives waste through qualified waste brokers. The following waste brokers may pick-up and transport radioactive waste to the Barnwell facility for generators or consult with generators about waste acceptance criteria and other requirements at the Barnwell site. If you would like to ship waste directly to Barnwell without the services of a waste broker, please contact the disposal site operator, Chem-Nuclear, LLC, at 803-256-0450.
